Color iMatch
Database Management Workshop

A 3-day, hands-on workshop designed for users of Color iMatch software.

x·rite **PANTONE**®

Color iMatch Database Management Workshop

This three-day workshop is designed for users of Color iMatch software and provides intensive, hands-on creation of an accurate and reliable formulation database. Work one-on-one with an experienced X-Rite Color Expert to create a customized formulation database unique to your application and requirements in a "train the trainer" format.

Who Should Attend?

Users of the Color iMatch formulation system.

Course Overview

- Fundamentals of color theory
- General iMatch overview of layout, settings files, templates, toolbars, file, edit, & window menus
- Instrument overview
- 5 key aspects of spectral curves
- Primary resin setup & load, basic materials & additives, white, black, setups, defaults and loads
- Formulation - settings options, formulation display, formulation options
- Formulation review, formulation toolbar, save recipe, recall recipe, formulation with alternate resin
- Correction setups, correction options, inputs, correction interactive, manual options
- Manual formulation options
- And more!

Benefits of Learning from X-Rite

- Hands-on learning environment.
- One-on-One time with an X-Rite Color Expert.
- The ability to create customized formulation, which is accurate and reliable, with the help of an X-Rite Color Expert.
- Time for Q & A throughout the day.
- The training is constructed for the unique and specific needs of the customer.
- This three day classroom gives enough time to cover any and all of the requests of the customer.
- The training will bring all aspects of the Color iMatch database software together and make it applicable to your specific workflow.
